

EV CHARGING

FOR WORKPLACES

OFFER EV CHARGING AS A COST-EFFECTIVE EMPLOYEE BENEFIT WITH MINIMAL OVERHEAD!

EV CHARGING FOR WORKPLACES

Employees spend a large portion of their time at work, but more than $\frac{3}{4}$ of electric vehicle owners struggle to recharge their EVs while in their workplace.

As a commercial/industrial building operator, there is a great opportunity to develop a charging infrastructure to benefit both employees and visitors of your properties.

THE EV CHARGING ADVANTAGE

Create an image of environmental-friendliness and sustainability for your building

Gain loyalty from employees and customers by being an eco-conscious business

Attract a talented workforce who are early adopters of EV technology

Earn carbon credits to reduce your company's carbon footprint, helping you reach net zero faster

RENO EV CHARGERS WITH ⚡ CHARGELAB EV CHARGING SOFTWARE

- **RFID Access.** Provide easy access to employees and visitors while controlling charger use via defined profile and link RFID cards.
- **Pricing Rules and Schedules.** Custom pricing, discounts at user level or offer free charging as an employee benefit.
- **Power Manager.** Optional Power Manager allows 4X more chargers on limited infrastructure.
- **Real-time support.** For drivers and site hosts to troubleshoot any issues.
